## Kerwick Appraisals Silver Worksheet

## Instructions

- Location/Room This is where the item is presently located. Hint: Try to follow the same logical order when listing items, such as going clockwise around the area.
- Page # Use this area to organize your pages.
- Item Name the item in a 1 or 2 word description. For example: "Flatware Set" or "Tea Set with Tray".
- Quantity List how many of the items are in this location. If it's a pair put 2.
- Date made Put the age of the item as close as you know or circle the Century. Remember, 20th Century means between 1900 & 2000. "Antique" is considered over 100 years old.
- Country/Origin Select the country where the item was made or check the appropriate area.
- Material Check one of the words and add what you know. For example: "Silver on copper"
- Description Add as much information as you can that would help someone distinguish this item from others like it. For example: how many candles does it hold or does it come with a box? If you know any history, mention it here. For example: Inherited from your grandmother or bought it in 1998 and paid \$2500.00.
- Size Measure your item in inches. At least measure how tall it is and weigh it if in Troy ounces.
- Condition Mention any damage and check the condition. Here are the definitions that Kerwick Appraisals use to define the condition:
  - Excellent Like new, no restoration needed.
  - Good Typical for its type and age with normal wear and tear.
  - Poor Restoration is needed and would greatly enhance its present value unless the cost would exceed the value of the item. For example: POOR with scratches
